Under the REACH regulation, all the products of POLİLUX (plastics films) are manufactured items obtained from polymers, and so exempted from REACH registration, (including February 16th update).

POLİLUX have taken all the necessary steps to ensure that the chemical components from which POLİLUX's products are obtained fulfill the obligation of the REACH registration, with specific requests of declarations from POLİLUX's raw material suppliers.

Polymers are exempted from the provisions of registration of Title II of REACH (Article 2(9)). Polymer Masterbatches are considered, in regulatory terms, "preparations", and are exempted from the provisions of registration. Nevertheless, the obligation of registration of the individual chemical substances used by the raw material suppliers to POLİLUX (Producers of Polymers and Producers of Polymer Masterbatches) goes down in the supply chain to the obliged parties that supply the base chemicals and monomers (namely; propylene monomer) to the Producers of Polymers and Producers of Polymer Masterbatches that are the present suppliers to POLİLUX.

**SVHC:** We confirm that our BOPP Films do not contain in their composition more than 0.1% (w/w) concentration of the substances listed in SVHC (substances very high concern), which is updated on 14 June 2023 by ECHA (European Chemicals Agency).

*This Declaration is valid starting from the issue date, and will be modified in the case of significant modification in our products formula structure or in the case of legislation amendments.*
